ABOUT ÆDRA AND OUR DELIVERY METHOD

EXPERIENCE BEHIND THE WORK

20+ **years of combined professional construction experience**

Ædra ApS brings together professional know-how developed through subcontracting in Italy since 2006 and construction management, coordination and delivery in Denmark. This experience belongs to the team and leadership; it is not a claim about the company's incorporation date.

WHAT CLIENTS CAN EXPECT

01 CLEAR SCOPE

Materials, trade boundaries, access requirements and responsibilities are agreed before mobilisation.

02 COORDINATED EXECUTION

Resources, sequencing, site supervision and inspections follow the project programme.

03 DOCUMENTED HANDOVER

Inspection records, concealed-work photographs and nonconformity close-out are tracked.

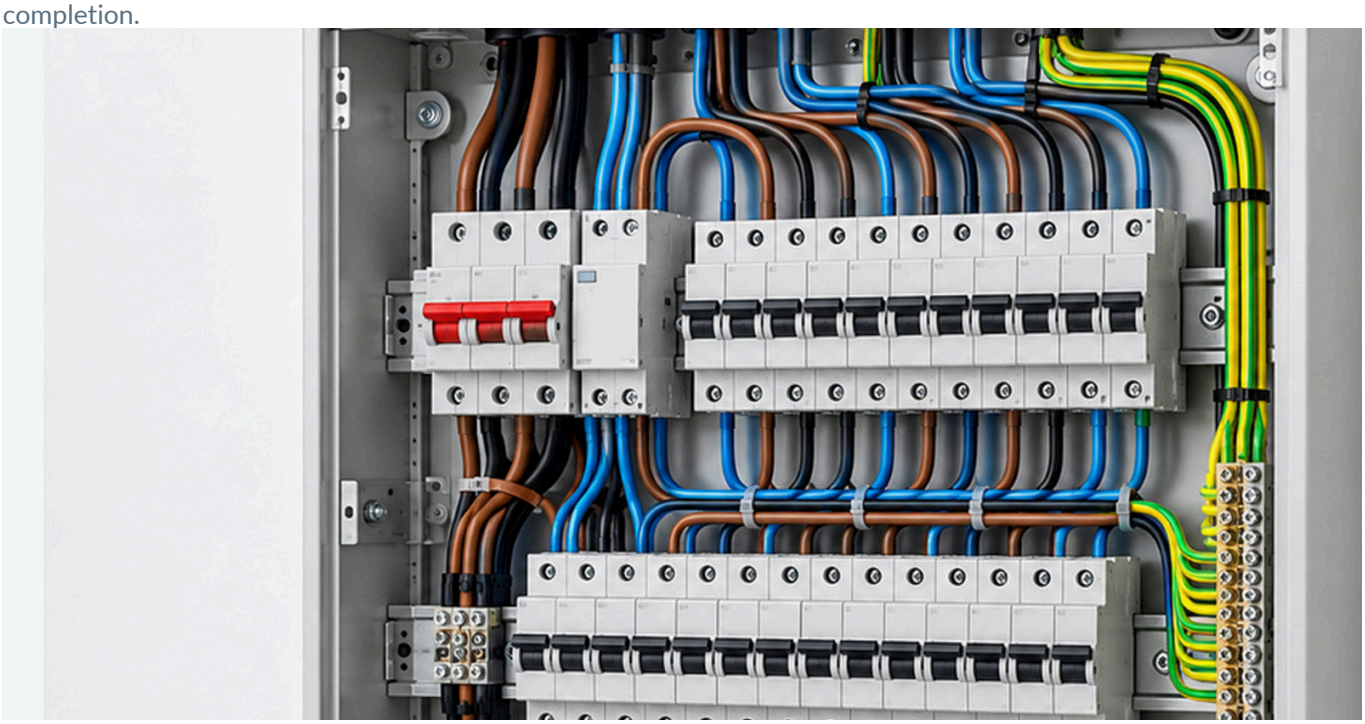

DANSK INDUSTRI (DI)

The companies' DI membership and applicable collective agreements are stated on the basis of company information. The relevant agreement depends on the employer, occupation and assignment. DI membership is not a technical certification.

SOLUTIONS AND APPLICATIONS

FOUR DISTINCT WORK PACKAGES

Every work package is defined through a buildable scope, clear interfaces, quality checks and documented completion.

01 Cable trays and containment interfaces

Coordinate supports, penetrations and containment routes with the authorised electrical contractor before surrounding works are closed.

02 Electrical panel walls and builders' works

Prepare backing, openings, access and non-electrical enclosure details against the panel supplier's approved dimensions.

03 Service penetration and fire separation

Coordinate cable passages through rated construction and implement the approved construction and firestopping works.

04 Temporary site electrical interfaces

Coordinate physical protection, temporary power locations and safe construction access under the responsible authorised site electrical installer.

EXECUTION AND QUALITY CONTROLS

TECHNICAL DELIVERY / CONTROL POINTS

01 Cable trays and containment interfaces

INSTALLATION / DELIVERY METHOD

Coordinate supports, penetrations and containment routes with the authorised electrical contractor before surrounding works are closed.

QUALITY HOLD POINT

Inspect buildability, support spacing, separation of services and construction penetrations.

02 Electrical panel walls and builders' works

INSTALLATION / DELIVERY METHOD

Prepare backing, openings, access and non-electrical enclosure details against the panel supplier's approved dimensions.

QUALITY HOLD POINT

Check clearances, backing capacity and scope boundaries; electrical connection remains with the authorised contractor.

EXECUTION AND QUALITY CONTROLS

TECHNICAL DELIVERY / CONTROL POINTS

03 Service penetration and fire separation

INSTALLATION / DELIVERY METHOD

Coordinate cable passages through rated construction and implement the approved construction and firestopping works.

QUALITY HOLD POINT

Check tested firestop system, future cable fill allowance and the electrical contractor's acceptance.

04 Temporary site electrical interfaces

INSTALLATION / DELIVERY METHOD

Coordinate physical protection, temporary power locations and safe construction access under the responsible authorised site electrical installer.

QUALITY HOLD POINT

Verify segregation, access arrangements and formal responsibilities for testing and energisation.

MATERIALS AND TRADE INTERFACES

DETAILS THAT MAKE DELIVERY RELIABLE

Confirm the design intent before installation; record concealed interfaces; release the next trade only when the relevant quality hold point is closed.

PROJECT INTERFACE CHECKLIST

01 Building element / substrate

02 Mounting bracket / cable tray

03 Separated service routes

04 Boundary with electrical trade

FOUR CRITICAL INTERFACE QUESTIONS

01 Approved substrate and loads

02 Material and system selection

03 Trade and service interfaces

04 Inspection and handover evidence

SYSTEM REQUIREMENT: Dimensions, classifications, installation approvals and permissible activities are established by the project design and the selected manufacturer's documented system.

PROGRAMME / QA-QC / HSE

A DELIVERY PROCESS THAT CAN BE VERIFIED

01 PROJECT DEFINITION

Scope boundaries, design revisions, materials and acceptance criteria.

02 PLANNING & LOGISTICS

Access, sequence, deliveries, interfaces and temporary works.

03 FIRST INSTALLATION

Inspect first-off work or a representative mock-up before repetition.

04 ROUTINE INSPECTIONS

Photographs, dimensions and records of work that will be concealed.

05 DEFECTS & FOLLOW-UP

Assign observations, corrective actions and close-out responsibilities.

06 HANDOVER

Deliver checklists, relevant product records and the agreed dossier.

Safety arrangements and competence boundaries must be agreed for the assignment. Reserved electrical and plumbing installations must be undertaken and signed off by appropriately authorised contractors; Ædra may coordinate builders' works and installation support within its agreed scope.

ÆDRA

SPECIALISATION 08 / ELECTRICAL INTERFACES

FROM FIRST SET-OUT TO THE FINAL INSPECTION.

YOUR PARTNER FOR A COORDINATED PACKAGE

Ædra supports complex building projects through specialised execution, site coordination and documented quality. Share your project, drawings and programme so we can clarify scope and the next step together.
