ABOUT ÆDRA AND OUR DELIVERY METHOD

EXPERIENCE BEHIND THE WORK

20+ **years of combined professional construction experience**

Ædra ApS brings together professional know-how developed through subcontracting in Italy since 2006 and construction management, coordination and delivery in Denmark. This experience belongs to the team and leadership; it is not a claim about the company's incorporation date.

WHAT CLIENTS CAN EXPECT

01 CLEAR SCOPE

Materials, trade boundaries, access requirements and responsibilities are agreed before mobilisation.

02 COORDINATED EXECUTION

Resources, sequencing, site supervision and inspections follow the project programme.

03 DOCUMENTED HANDOVER

Inspection records, concealed-work photographs and nonconformity close-out are tracked.

DANSK INDUSTRI (DI)

The companies' DI membership and applicable collective agreements are stated on the basis of company information. The relevant agreement depends on the employer, occupation and assignment. DI membership is not a technical certification.

SOLUTIONS AND APPLICATIONS

FOUR DISTINCT WORK PACKAGES

Every work package is defined through a buildable scope, clear interfaces, quality checks and documented completion.

01 Work-package planning and look-ahead programmes

Translate the client's programme into safe work fronts, sequence constraints, procurement dates and accountable short-term actions.

02 QA/QC inspections and traceable evidence

Define inspection points and checklists with the client, capture concealed works and record corrective actions.

03 HSE coordination and task briefings

Coordinate task-specific risk controls, access, permits and toolbox briefings with the responsible site safety roles.

04 Digital documentation and handover

Organise drawing revisions, progress records, defects and completion documentation in a consistent handover package.

EXECUTION AND QUALITY CONTROLS

TECHNICAL DELIVERY / CONTROL POINTS

01 Work-package planning and look-ahead programmes

INSTALLATION / DELIVERY METHOD

Translate the client's programme into safe work fronts, sequence constraints, procurement dates and accountable short-term actions.

QUALITY HOLD POINT

Review milestones, daily access, interface dependencies and changes against the approved baseline.

02 QA/QC inspections and traceable evidence

INSTALLATION / DELIVERY METHOD

Define inspection points and checklists with the client, capture concealed works and record corrective actions.

QUALITY HOLD POINT

Verify product approvals, photographic evidence, closure status and sign-offs.

EXECUTION AND QUALITY CONTROLS

TECHNICAL DELIVERY / CONTROL POINTS

03 HSE coordination and task briefings

INSTALLATION / DELIVERY METHOD

Coordinate task-specific risk controls, access, permits and toolbox briefings with the responsible site safety roles.

QUALITY HOLD POINT

Track observations, corrective actions, equipment inspections and competence boundaries.

04 Digital documentation and handover

INSTALLATION / DELIVERY METHOD

Organise drawing revisions, progress records, defects and completion documentation in a consistent handover package.

QUALITY HOLD POINT

Check document completeness, revision status, outstanding issues and client acceptance.

MATERIALS AND TRADE INTERFACES

DETAILS THAT MAKE DELIVERY RELIABLE

Confirm the design intent before installation; record concealed interfaces; release the next trade only when the relevant quality hold point is closed.

FOUR CRITICAL INTERFACE QUESTIONS

01 Approved substrate and loads

02 Material and system selection

03 Trade and service interfaces

04 Inspection and handover evidence

SYSTEM REQUIREMENT: Dimensions, classifications, installation approvals and permissible activities are established by the project design and the selected manufacturer's documented system.

PROGRAMME / QA-QC / HSE

A DELIVERY PROCESS THAT CAN BE VERIFIED

01 PROJECT DEFINITION

Scope boundaries, design revisions, materials and acceptance criteria.

02 PLANNING & LOGISTICS

Access, sequence, deliveries, interfaces and temporary works.

03 FIRST INSTALLATION

Inspect first-off work or a representative mock-up before repetition.

04 ROUTINE INSPECTIONS

Photographs, dimensions and records of work that will be concealed.

05 DEFECTS & FOLLOW-UP

Assign observations, corrective actions and close-out responsibilities.

06 HANDOVER

Deliver checklists, relevant product records and the agreed dossier.

Safety arrangements and competence boundaries must be agreed for the assignment. Reserved electrical and plumbing installations must be undertaken and signed off by appropriately authorised contractors; Ædra may coordinate builders' works and installation support within its agreed scope.

ÆDRA

SPECIALISATION 11 / SITE DELIVERY

FROM FIRST SET-OUT TO THE FINAL INSPECTION.

YOUR PARTNER FOR A COORDINATED PACKAGE

Ædra supports complex building projects through specialised execution, site coordination and documented quality. Share your project, drawings and programme so we can clarify scope and the next step together.
